

Hyperspectral Remote Sensing in Europe

SWOT and User Needs workshop

Date: 5th and 6th of July 2006

In this two-day workshop the SWOT of hyperspectral remote sensing in Europe and the user needs regarding operational, data quality and accuracy aspects of hyperspectral images now and in the future will be explored. During discussions in small groups, initiated by presentations, more insight will be gathered on these topics.

Location

The location of the workshop is:
DLR Oberpfaffenhofen
82234 Weßling
Germany

Accommodation

Hotel accommodation is available in Herrsching, 20km west of Oberpfaffenhofen. Transport between workshop location and hotel will be arranged.

Social program

Wednesday evening there will be a tour through the Mühlfeldbräu brewery in Herrsching. Afterwards we will have dinner in the brewery's restaurant. At 21:00 there is the possibility to watch the semi-final World Cup match at large screen.
